S	SUM OF NUMBERS AT PRIME FACTORS	×
D D	SPERIMENT  Le  SUM OF NUMBERS AT PRIME FACTORS  Description  Description	2305040
S	Prime factors of a positive integer are the prime numbers that divide that integer exactly.	V
8R23C5	Given an array arr of n integers and a positive integer num.	36 <sup>R</sup>
	Let's suppose prime factorization of num is: $p^a x q^b x r^c x \dots x z^f$ , where p,q,rz are prime numbers.	,0A9 3BR
3C50A9	Sum of numbers in array arr at indices of prime factors of number num is: $a \times arr[p] + b \times arr[q] + c \times arr[r] + + f \times arr[z]$ .	
3050	You are given an array arr of size n and a positive integer num. You are required to calculate the sum of numbers in arr as mentioned above, and print the same.	3BR13C
25	Note:	
AN 3BR	<ul> <li>If arr is empty, print -1.</li> <li>If prime factor of num not found as indices, print 0.</li> </ul>	1305010
C	Input Format:	V
aRl3C3	The input consists of three lines:	.8
, o	<ul> <li>The first line contains an integer, i.e. n.</li> <li>The second line contains an array arr of length of n.</li> <li>The third line contains an integer num</li> </ul>	,0 <sup>A9</sup> 3BP
3C50A9	The input will be read from the STDIN by the candidates.	300
	Output Format:	3BR
3BR	Print the sum that was mentioned in the problem statement.	
	Example:	CSOA0
	Input:	130
	6	
	11 21 32 45 1 23	OKB 3BY
	6	ż
	Output:	, o.C.
	77	388435
	Explanation:
